AVIATION SOFTWARE SOLUTIONS

As aviation software development company, we fully cater to airports and other operators in the aviation industry with custom flight operations software, reservation and ticketing systems, and MRO (Maintenance, Repair and Overhaul) software solutions.

Airline Reservation & Ticketing Systems

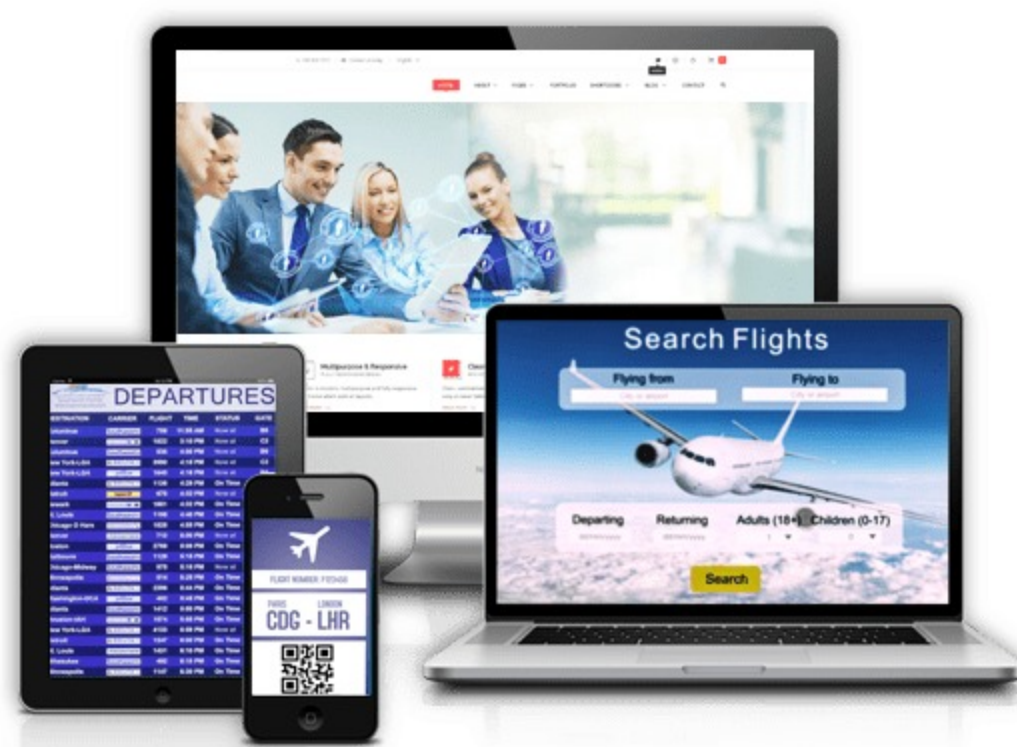

MRO Software Solutions

Flight Operations Management Software

Drone Software Services

FLIGHT OPERATIONS MANAGEMENT SOFTWARE

Chetu's aviation DCS is world-class in FLIGHT OPERATING SYSTEM DEVELOPMENT. Our flight operations development solutions include scheduling and dispatch management, events monitoring, EFB App Development and modification services for small to enterprise-size businesses. We engineer departure control system to enable baggage tracking management and boarding management solutions to custom flight scheduling and flight operations management platforms. Our app development provides the integration of flight planning modules to optimize airport dispatch and flight logging software. Our safety management applications are customized for Passenger Name Records (PNR), No-Fly List Data, and configures ATI messaging systems.

- ✓ Custom Reporting Modules
- ✓ Invoice Management
- ✓ Flight Planning Modules
- ✓ Minimum Equipment Lists
- ✓ Slot Management

FLIGHT OPERATING SYSTEM DEVELOPMENT

- ✓ EFB App Development
- ✓ Document Management Solutions
- ✓ FCOM Development
- ✓ Custom Document Creation
- ✓ ATI Messaging

GROUND HANDLING SOFTWARE SOLUTIONS

- ✓ Crew Management Modules
- ✓ History Tracking Solutions
- ✓ Custom Rules-Based Queries
- ✓ Dispatch Modules Programming
- ✓ Flight Logging Software Solutions

AIRLINE RESERVATION & TICKETING SYSTEMS

We offer real-time airline software solutions for passenger service systems (PSS). Our booking management services provide seamless POS app development of E-commerce solutions for Global Distribution System (GDS) and aviation ticketing systems. We modify Airline Reservation Systems and database storage architectures using RDBMS-Relational Database Management System in back end development. These passenger management software solutions include flight schedule and seating management from mobile devices, kiosk software or via airline reservation ticketing agents. We configure airline ticketing systems for online check-in management, e-commerce payment, and boarding pass ticketing using 3D barcodes for real-time data driven solutions.

READ MORE

Airline Reservation Design

Our airline reservation system design solutions include flight schedule and seating management, and database architecture for data.

Airline Ticketing Services

Airline ticketing system services is programmed for online check-in management, online payment, and boarding pass printing.

Airline Reservation System

Our Safety management applications are customized for Passenger Name Records (PNR) and No-Fly List Data.

DCS Services

We provide DCS (Departure Control System) services that enable baggage tracking management, boarding management, and more.

AVIATION MAINTENANCE, REPAIR & OVERHAUL (MRO) SOFTWARE

Chetu's aviation maintenance software solutions streamline the MRO processes using rules-based queries and analytics. We ensure airlines compliance procedures, maintenance, and safety. Our MRO systems increase productivity for SMB and enterprise-size airlines and companies. We develop purchase management and parts procurement solutions to integrate with cloud-based technologies within our aviation maintenance tracking solutions. We create aviation maintenance management software for claims management applications, tracking software for automation reminders, and more. Our aviation maintenance software solutions provide safety and fleet management through crew management modules. Our aviation maintenance tracking enables reporting capabilities such as history tracking and aviation accounting software for ERP's integrations.

READ MORE

AVIATION COMPLIANCE SOFTWARE

Aviation compliance software solutions facilitate AC 120-78 compliant libraries with e-signature capabilities to share and store documents and project outlines.

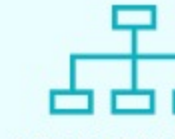

MRO SYSTEM INTEGRATION

Purchase management and parts procurement software are integrated with company systems, accounting software, OEM databases, and ERP programs.

AVIATION MAINTENANCE TRACKING

We create aviation maintenance tracking software for claims management applications, tracking software for automation reminders, and more.

HCM SERVICES

Our HCM (Human Capital Management) services manage certifications, due dates with integrations to various systems, and licenses.
